homesol

building solutions
health • comfort • sustainability

You make a world of difference. Homesol can prove it!

"We do not inherit the earth from our ancestors, we borrow it from our children."

Building healthy, comfortable, more resource-efficient homes is the way of the future. We can help you get there today.

Homesol Building Solutions provides accurate, cost-effective **green building consulting, testing and labeling services** throughout Ontario and across Canada. Count on Homesol's extensive knowledge and expertise for your **next green building projects**.

High performance homes make a world of difference. Be the change. Call Homesol today.

How can you make the invisible, valuable?

You know the challenge.

Buyers are ready to invest in quality green homes that have lower impact on the planet and cost less to operate each day. How can you meet those estoric demands and make the invisible benefits of energy efficiency and sustainability visible, and valuable?

Meet the team at Homesol Building Solutions.

Driven by commitment

Driven by a passionate commitment to green building, Homesol is a “LEED-ing” provider of energy consulting, testing, labeling and

verification services for contractors, renovators, homeowners, and government agencies.

Homesol’s team has delivered over 6,000 certified energy

Homesol uses advanced building diagnostics tools including infrared thermal imaging.

evaluations. Homesol was awarded *EnerQuality 2007 Evaluator of the Year*, and *Ottawa Construction News 2008 Readers’ Choice Award for Outstanding Commitment to Sustainable Development*.

Better builders build with Homesol

Homesol advises over 35 builders and developers, including Urbandale, Monarch, Braebury, Richcraft, Claridge, Cardel, Valecraft, Metric, Larco, Holitzner, RND and many more. Homesol works with Canada’s biggest and brightest energy stars!

From the ground up: the Homesol story

Homesol’s principal consultant Ross Elliott is not some ivory tower authority steeped in impractical theory. His lifetime of hands-on expertise ranges from historic renovations to running his own custom homebuilding business.

Ross understands buildings from the ground up. After university, he trained as an energy auditor in 1979 and as an R-2000 builder in 1983, the same year he obtained his Carpentry license.

Currently, Ross is building his own net-zero LEED Platinum home, café,

strawbale studio, bubble greenhouse and sustainable rural living demonstration project / training centre in McDonalds Corners, Ontario.

Led by experience

In 1999, Ross founded Homesol Building Solutions to help inspire contractors, designers and homeowners to create some of the most energy-efficient homes in the world.

Over the past decade, Homesol’s team of experts has grown and serves the brightest stars in the green building industry.

Ross Elliott, President of Homesol, Director – EnerQuality, CRESNET, Passive House Canada, Faculty – Canada Green Building Council, LEED-AP, RASDT, RRHD
